Department of Mechanical Engineering

A CONCISE REPORT ON THE VISIT TO

Construction Equipments Exhibition Trip (EXCON- 2023 at BIEC- BENGALURU)

ACU- BGSIT, Department of Mechanical Engineering 7th & 5th semester students visited the reputed **Construction Equipments Exhibition (EXCON- 2023 at BIEC- BENGALURU)** on 15th December-2023.

About the Exhibition- Excon-2023 is the International Construction Equipment and Technology Trade Fair and the most important event in the Indian market. They exhibit the latest innovations in technology and product development about:

- Machines and plants for reinforcement processing;
- Machines and plants for wire drawing and production of wire mesh;
- Machinery for the production of innovative building elements.

The students and faculty members were visited many stall exhibit by the KOMATSU, L&T, JCB, SANY, TATA and many more companies & acquired the knowledge about Innovative Construction Machinery, Green Construction Initiatives, Autonomous Construction Vehicles and a glimpse into the future of construction and engineering. They also featured an array of projects that ranged from conceptual designs to fully functional prototypes & understand the manufacturing methods of equipment problem-solving skills, apply theoretical knowledge in practical scenarios with various types of material used in building construction equipments. The visit proved to be very much useful for the student for their future field Practice.
